

Care and cleaning of Technical Textiles fabrics

RECASENS Technical Textiles fabrics are easy to maintain. The surface of the fabric is plastic and without pores, which makes it difficult for dirt to adhere, and at the same time, is easy to remove.

The accumulation of dirt and unwanted substances can end up damaging the finish of **Technical Textiles** fabrics and cause an accelerated deterioration. It is recommended to clean periodically the fabric to prevent the accumulation of dirt causing mildew and mold growth.

For effective cleaning, it is enough to pass a sponge with soapy water and then rinse with clean water. Let dry with the fabric fully unfolded.

It is recommended to use neutral detergents (non-ionic) and with a low percentage of alcohol. Avoid using very acidic or very alkaline detergents and do not use solvents or bleaching agents such as bleach or hydrogen peroxide.

To avoid damaging the fabric finish, do not use abrasive substances or brushes, or use high pressure water jet cleaning systems.

WARRANTY Certificate of Technical Textiles fabrics

Technical Textiles are covered by a warranty for a period of 5 years from the date of purchase.

The **WARRANTY** covers the abnormal deterioration, rot and loss of color of **Technical Textiles** fabrics subject to normal environmental conditions and on which a proper maintenance has been systematically performed.

The **WARRANTY** covers only the value of **Technical Textiles** fabrics and specifically excludes any other element of the application in which it is installed (hardware, mechanisms, etc.), as well as the costs of making and installing said application.

The **WARRANTY** does not cover any deterioration due to abuse, neglect, vandalism, burns of any kind, fires and natural disasters.

In particular, it does **NOT** cover the deterioration caused by:

- The lack of maintenance of the fabric or its use of inappropriate products or instruments. In particular, **NEVER** use solvents or hard brushes or other scraping instruments that can damage the protective treatment of **Technical Textiles** fabrics.

- Environmental or phytosanitary pollution.
- Organic dirt produced by animals.
- Assembly defects or user maneuver errors.
- Placing objects on top of the fabric, or dropping objects on it.
- Unusual atmospheric conditions (rays, storms, etc.).

The **WARRANTY** excludes the cost of any mechanical device (machinery, mechanisms, structures, etc.), as well as any manufacturing, assembly and installation costs.

The replacement or reimbursement of defective tissue does not imply an extension of the **WARRANTY** of the replacement fabric.

Technical Textiles fabrics are a component of the final product. In case of detecting any kind of defect in the fabric, please contact your installer or distributor from whom you purchased the product.
